

YOUR DOOR OPENER TO FUTURE MOBILITY

Digital Key for construction machinery

Your challenges

- Complexity in implementing a fully CCC-compliant Digital Key system.
- Digitize your access to machinery and equipment fleets and make creating, managing and issuing secure and flexible - ideally also CCC-compliant (offline use possible without any problems).
- Seamless interaction between a vehicle OEM server and the installed hardware.
- Entering the market with your own Digital Key solution.

Our solutions

1. doubleSlash Digital Key (Software)
You already have the hardware needed for realizing a Digital Key system? Perfect: We deliver the corresponding software part of the Digital Key.

2. Modular solution (Software + Hardware)
You are looking for a solution covering all parts? Our modular solution is the right choice for you. We take care of the software whereas our partner Marquardt provides the hardware. Together, we deliver a harmonized E2E Digital Key product.

doubleSlash Digital Key

- Software product including all components necessary for realizing a vehicle OEM server for a CCC-compliant Digital Key.
- Integration of the doubleSlash Digital Key software product into your existing infrastructure.
- Additional services such as 3rd level support, maintenance and hosting.
- We provide the solution as SaaS & PaaS.
- We offer flexible pricing models.

Your partner for a future-proof Digital Key solution

Market-proven solution:
Our solution is already used by multiple premium OEMs.

Hardware-agnostic product design:
The doubleSlash Digital Key works with any CCC-compliant hardware.

25 years of mobility know-how:
We know our way around the digital key cosmos of various mobility industries. We are familiar with OEM backends, processes and the entire ecosystem and ensure seamless integration.

Supported infrastructures

CCC Conformity
The doubleSlash Digital Key (vehicle OEM server) is implemented in close accordance with CCC requirements to fulfill the Digital Key standards.

Seamless integration
Our software product is a cloud-based application using standardised tools and interfaces for a seamless integration.

Ready to deploy
Through our hardware partnership and shared modular solution with Marquardt, which includes both hardware and off-board software, we significantly accelerate your time-to-market plans.
