

INDIVIDUAL GEN-AI OUT OF THE BOX

doubleSlash AI Assistant

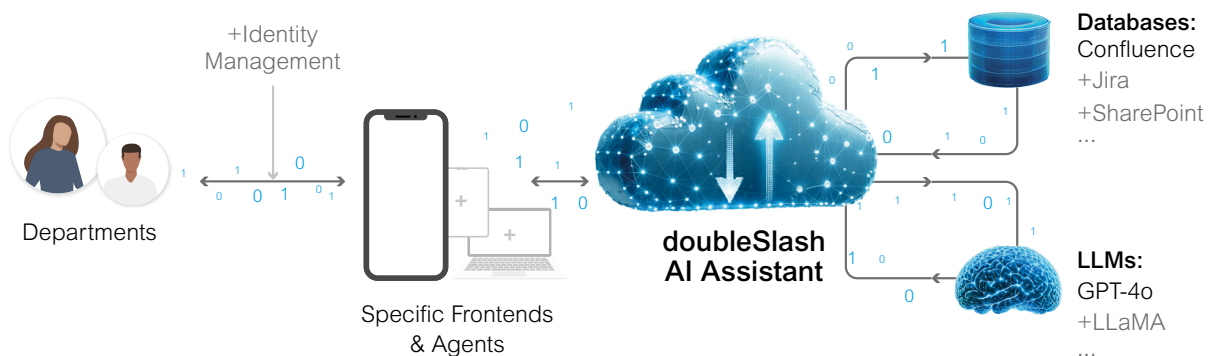

50% more efficient processes with GenAI

Increase your efficiency with the doubleSlash AI Assistant – the AI-based support for secure and automated data processing in business processes.

Use generative intelligence to efficiently process data from internal systems.

Our solution can be seamlessly integrated into your IT and business structures to optimize work-flows and deploy corporate knowledge in a targeted manner. Whether knowledge base, customized GPTs/LLMs or other data sources – our Assistant takes your processes to the next level, individually adaptable to your specific requirements and use cases.

- ✓ Own AI Assistant environment
(based on established LLMs & GenAI models)
- ✓ “Chat with your documents” (RAG):
Generate content from your own documents
- ✓ Interface to the central knowledge database
(Confluence, SharePoint, ...)
- ✓ Individually expandable with additional assistants
(Joint identification of suitable use cases and development of specific user interfaces for e.g. Sales Assistant, Support Assistant, ...)

”

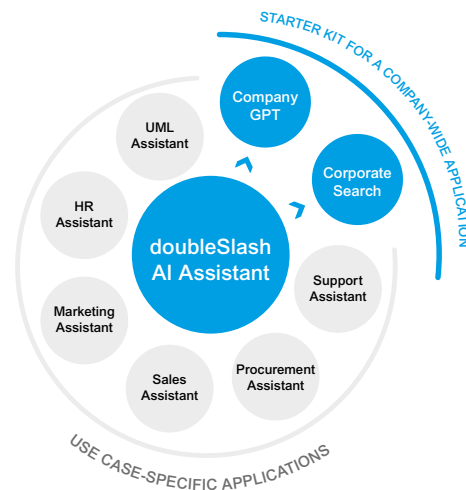

Efficient knowledge management with the AI Assistant is the entry into generative AI - with our solution, you can gradually expand the possible applications in all areas of the company. With the starter kit, you can quickly and easily obtain a proof of concept and then optimize other areas in a targeted manner.

– Philipp Schmied, AI Consultant at doubleSlash

Fields of application

The doubleSlash AI Assistant revolutionizes specialist areas in which efficient knowledge management and optimized processes are crucial. are crucial.

For example, AI-supported support and service assistants, dynamic knowledge databases and automatically generated project manuals can sustainably optimize a wide range of business areas.

The strengths of the doubleSlash AI Assistant

Our AI Assistant transforms the way companies work through customized AI solutions tailored specifically to your needs:
