

FASTER ROOT CAUSE ANALYSIS. LESS MANUAL EFFORT. HIGHER QUALITY.

AI Assistant for Efficient Complaint Handling

Due to the current tight market conditions, competition among suppliers is intensifying even among existing customers. Compliance with quality requirements and documentation obligations, as well as quick response times, are therefore essential for continued business success.

Your Challenges

- > High manual effort involved in creating 8D reports
- > Time-consuming root cause analysis and information gathering
- > Variations in the quality and completeness of reports
- > Expert knowledge is difficult to access or scattered across the organization
- > Recurring failure patterns are not utilized efficiently
- > High time pressure when handling customer complaints and audits

Our Solution: An AI Assistant for Your 8D Process

- ✔ Automated analysis and structuring of complaint data
- ✔ Support for root cause analysis and identifying corrective actions
- ✔ Intelligent suggestions for 8D content and wording
- ✔ Access to existing quality and experiential knowledge
- ✔ Integration with existing quality and ticketing systems
- ✔ Transparent traceability of AI-generated content
