SUSTAINABLE, BUSINESS-CENTERED & AUTOMATED MANAGEMENT OF YOUR COMPANY

# Data Hub − Your company reporting
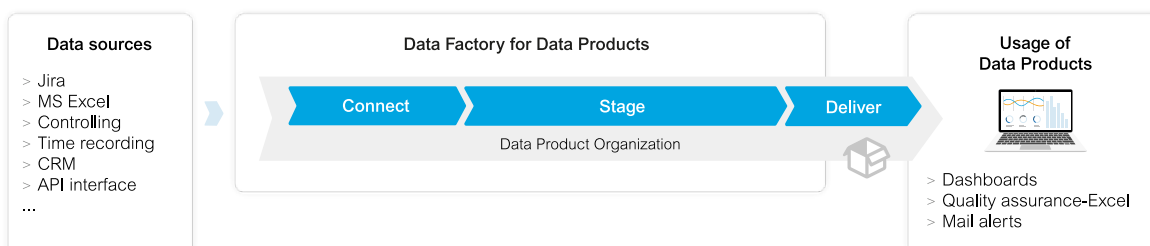

## Are you aware of these challenges in corporate reporting?

› Belly decisions instead of data-driven decisions

› Lack of transparency & no "single source of truth"

› High manual effort

› Lack of data quality

› No meaningful KPIs

› Many data sources

› Low-performance solutions

This was also the case for us at doubleSlash. As software developers, we have faced this challenge within the company. That's why we developed our own solution for growing and medium-sized companies, the doubleSlash Data Hub.

## Automate your reports - from the data sources to the dashboard

Choose from over 40 use cases, tailored to your individual business needs and your data. From marketing & sales, project management, CSR and IT to management & controlling.
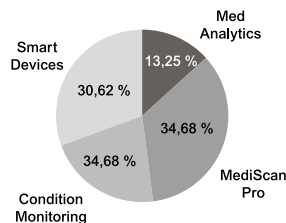

**Data sources**

> Jira
> MS Excel
> Controlling
> Time recording
> CRM
> API interface
...

**Data Factory for Data Products**

Connect    Stage    Deliver

Data Product Organization

**Usage of Data Products**

> Dashboards
> Quality assurance-Excel
> Mail alerts

## Our introductory offer for you:

### WORKSHOP
### Data Hub Starter ★

FIXED PRICE

# €5,900*

*The Data Hub Starter Package is currently for 5.900€ instead of 7.900€

In the Data Hub Starter Workshops, we select your use cases together, identify the necessary data sources and determine your data readiness. At the end, you will receive a plan for the introduction of your data hub.

- ☑ Definition of the technical data requirements
- ☑ Assessment of data readiness and complexity of the data products
- ☑ Prototypical visualization in dashboards
- ☑ Cost estimate for the implementation of the use cases
