MIX TEAM SPIRIT WITH CREATIVITY

Agile Mixperience

Immerse yourself and your team in the world of creative product development in three fast-paced sprints. Real requirements and practical conditions make Scrum tangible.

Our workshop offers insights into the agile working world for everyone, regardless of their experience with Scrum. Trying out new roles in the framework promotes fresh perspectives on team dynamics and innovative product development.

Due to its short duration, the Agile Mixperience is ideal as a stand-alone workshop, but also as a supplement to the project kick-off.

Scope of services

The workshop usually lasts half a day. After the workshop, participants have the opportunity to arrange a telephone coaching appointment to discuss their practical problems with agile methods in their working environment.

› Conducted by two experienced trainers from our company

› Target group-oriented, theoretical introduction

› Implementation of iterative sprints with all essential roles and meetings

› Providing tips and tricks for implementation in your own working environment

› Reflection at the end of each sprint

› Coaching the participants

> " Taking part in the doubleSlash Mixperience gave me a completely new understanding of SCRUM. The compact summary and the inspiring task of preparing drinks according to SCRUM have consolidated my know-how and motivated me to and motivated me to implement SCRUM even more consistently in my daily project work.

Who is it suitable for?

New project members
Enables playful integration into ongoing Scrum projects.

Experienced project members
For those who want to re-evaluate their existing Scrum practice.

Scrum enthusiasts
Ideal for people with no previous experience of the Scrum framework.

Companys
For organizations evaluating the suitability of Scrum for agile software development.

Our offer

We would be happy to clarify your requirements for the agile mix-perience workshop in a free preliminary discussion. In particular, we are interested in what goals you are pursuing with the workshop, how many participants should be involved and what experience you have had with the Scrum framework to date.

Workshops with doubleSlash

Dynamic, practice-oriented and effective
Discover an interactive workshop that teaches Scrum principles and promotes the exchange of knowledge. The focus is on practical application rather than pure theory.

Get to know the strengths and weaknesses of Scrum
You will learn about the advantages and disadvantages of Scrum and can consider how to use what you have learned. Find out quickly whether Scrum fits into your working environment.

Experienced coaches
Our experienced coaches enrich both Scrum newcomers and experienced colleagues. The workshops deepen the understanding of Scrum and offer new perspectives on agile projects.

Effective team building with Agile Mixperience
Our workshop teaches the Scrum framework and strengthens team spirit, ideal for team events. In the long term, you will benefit from better collaboration in projects.
